

# Big Bank Boss Analytics for Stocks 2024

By  
Wayne Boston  
9/23/24

# Introduction (1 of 2)

- The purpose of everything presented is to support the theme of my book entitled “Hyperdrive your Investment Account to Retire Early”. The Time Lapse PowerPoint slides is a condensed version of the Big Bank Boss Newsletter.
- The first slide is presented to help you see the 10-YR YTD Annualized performance of stocks. The annualized performance represents average performance and puts less focus on the year-to-year positive performance and negative performance. I do provide the year-to-year performance for you have an understanding that securities you own will have good and bad years, so you should not panic in the midst of a bad year performance of securities in your portfolio.

# Introduction (2 of 2)

- Notice the 1, 2, 3, 4, and 5 highest YTD performance stocks are not constant and bounce around stock to stock from year to year. I have highlighted the yearly rankings of 1, 2, 3, 4, and 5 in “Orange” to make it stand out. The Magnificent 7 Stocks are in Bold and Italic to make them stand out. The upcoming Bar charts use a Bubble Up approach to identify weekly winners and suggest potential sell indicators. These weekly winner will become the champion YTD winners in a Hyperdrive Portfolio.

# Potential Stock Picks for 2024 w/ Year-To-Date Performances from 2023 - 2018

Symbol	Company / Industry	GROWTH RANKING 2024	YTD 9/20/24	GROWTH RANKING 2023	YTD 2023	GROWTH RANKING 2022	YTD 2022	GROWTH RANKING 2021	YTD 2021	GROWTH RANKING 2020	YTD 2020	GROWTH RANKING 2019	YTD 2019	GROWTH RANKING 2018	10-YR Growth Rate	10-YR Annualized Rate

# Explanation of the Bar Charts (1 of 3)

The next PowerPoint slides are bar charts with four key elements:

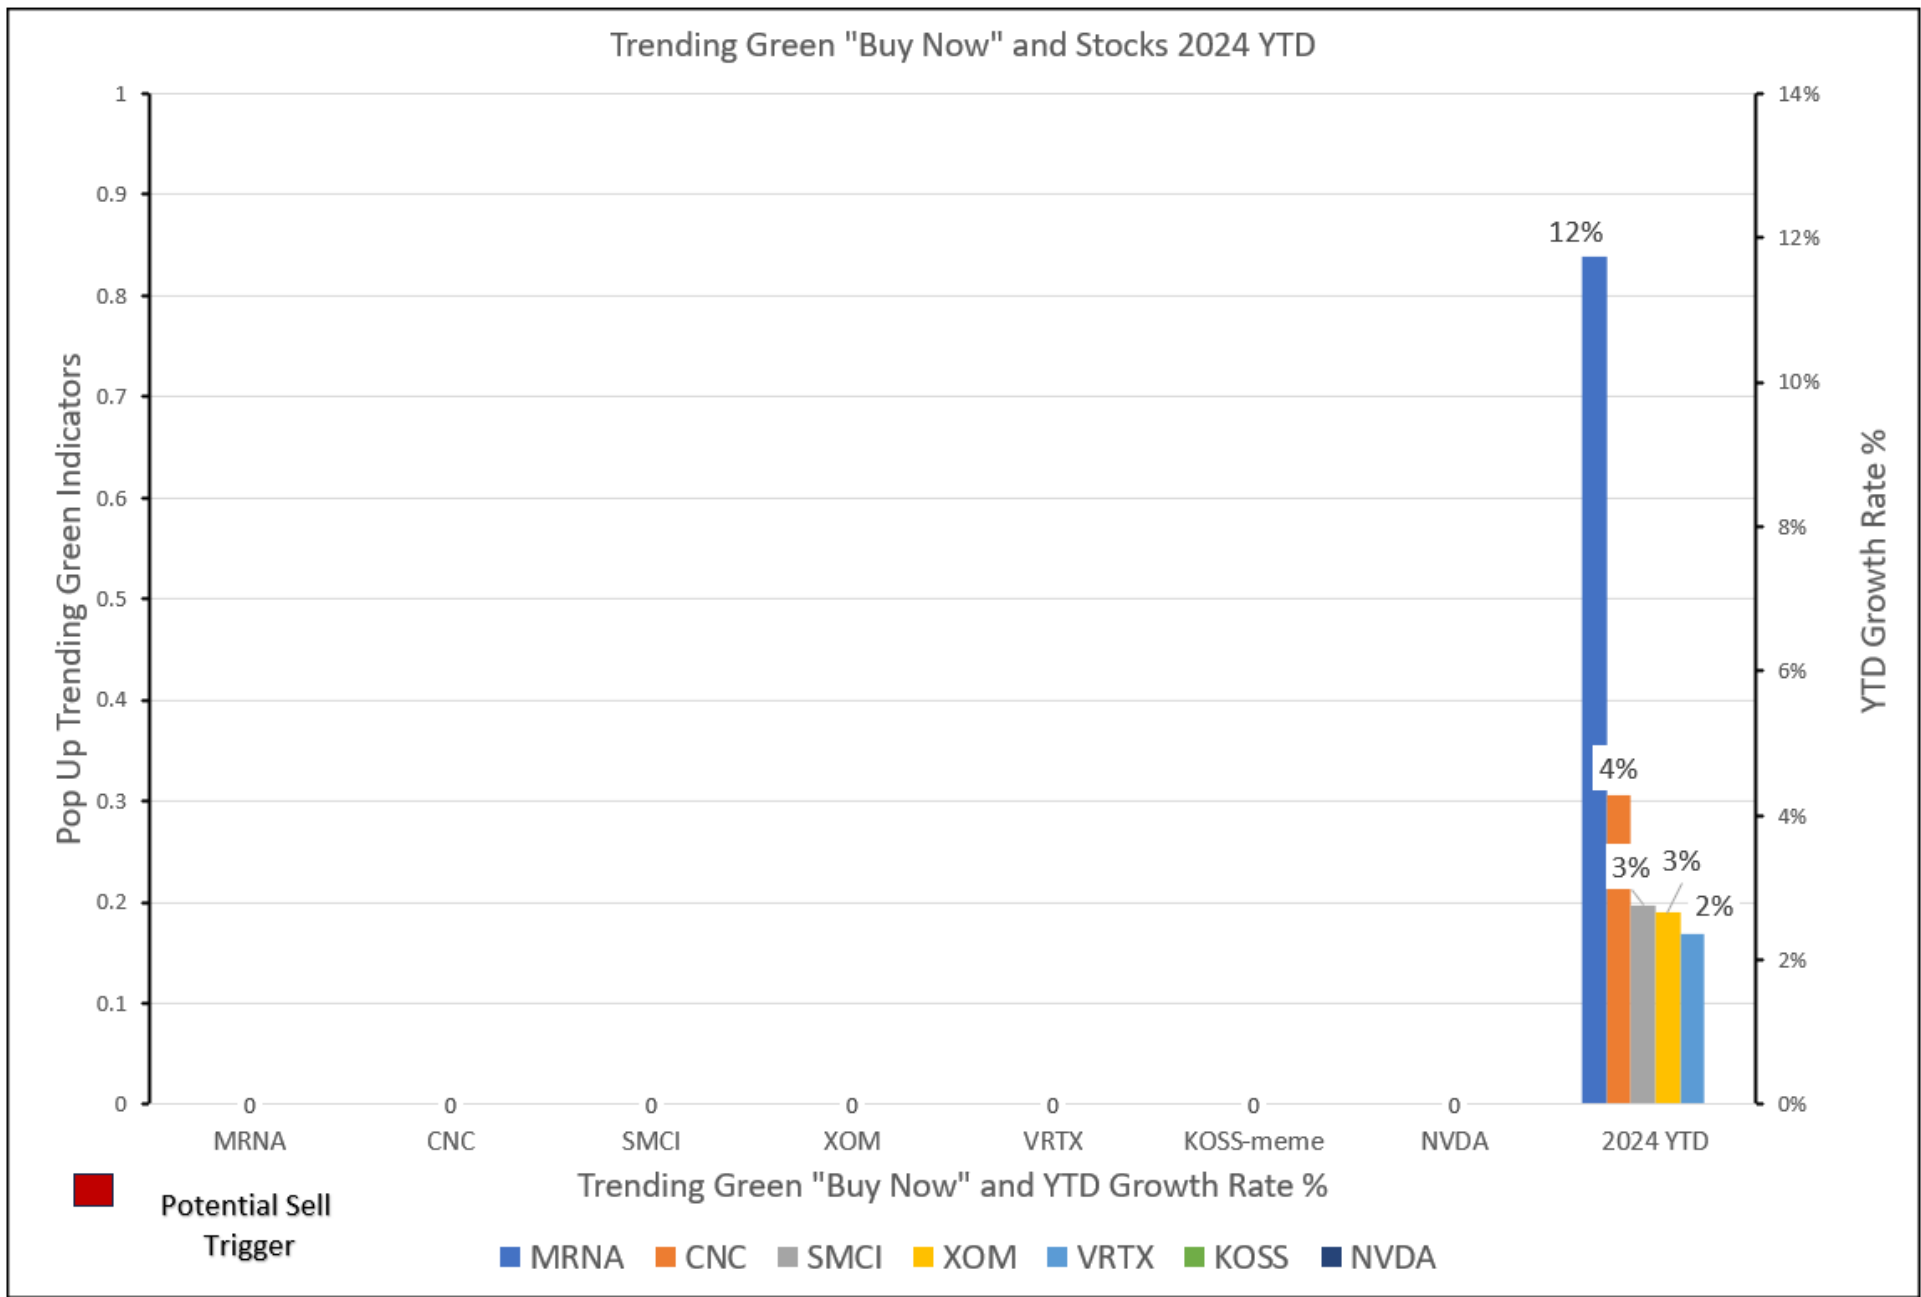

- (1) The 7 securities shown at the bottom of the chart are positioned from Left to Right that have the highest ranking of 1 thru 7 weekly.
- (2) The left y-axis represents the number of Trending Green or Buy Now indicators for the 7 securities.
- (3) The right y-axis represents the Year to Date (YTD) growth for the first 5 securities from left to right.
- (4) All securities have a YTD floating threshold trigger that must be exceeded before a potential sell indicator is shown in “Red” above the Trending Green indicator. The potential sell indicator is exactly what it is an indicator. You can choose to sell or not. The bar charts are provided as informational analytical information.

# Explanation of the Bar Charts (2 of 3)

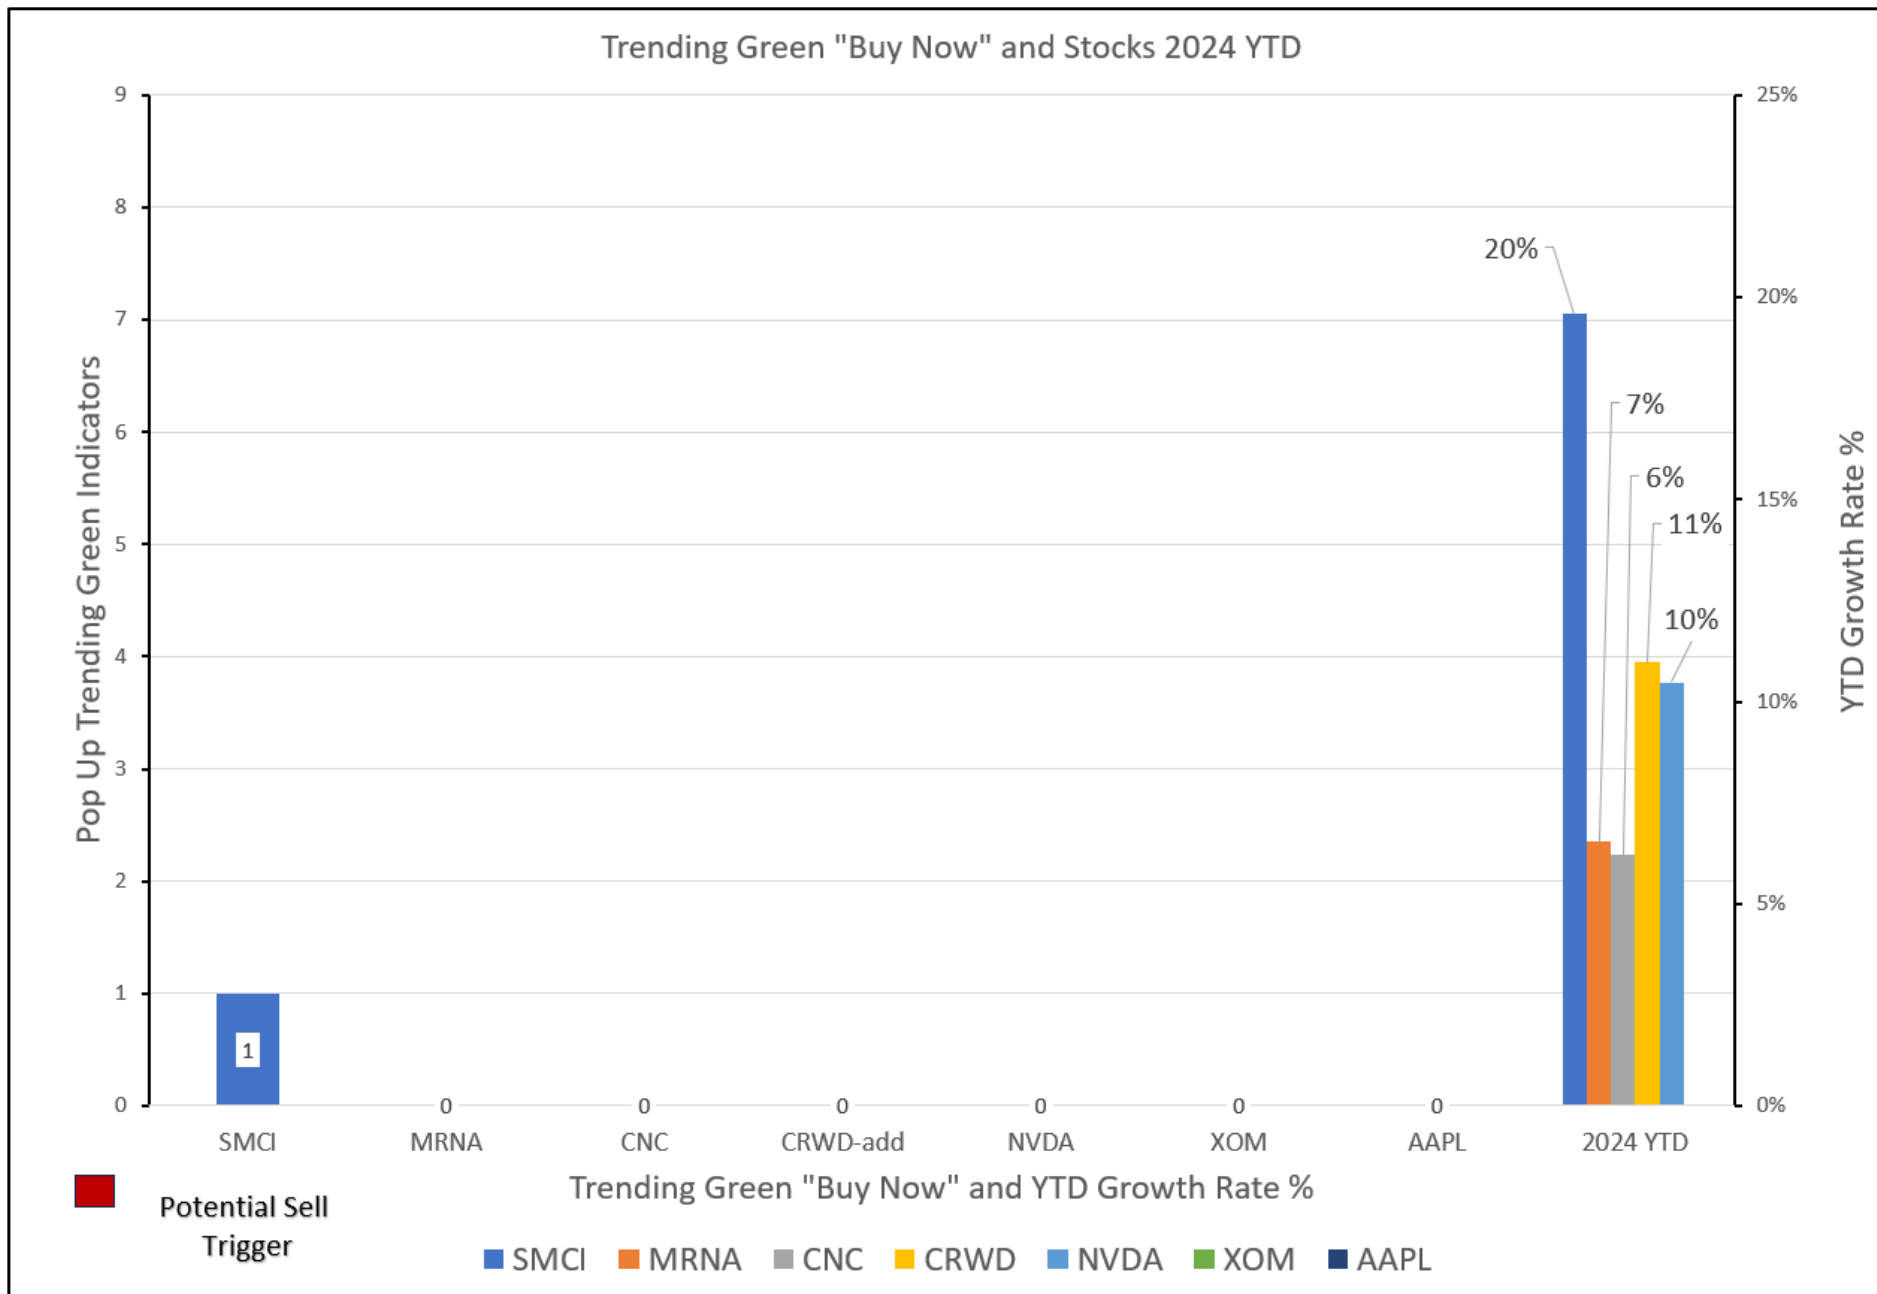

- Let's assume you are a professional fisherman with the goal of catching big fish. This is the best analogy for you to see the PowerPoint results with understanding.
- The 10-YR YTD annualized chart represents the largest potential fish from 1st to Last. The professional fisherman's most important tool is a fish finder. You don't drop your line in the water anywhere to start fishing, but a professional fisherman uses a fish finder as an analytics tool to optimize results. An informed investor uses the Big Bank Boss Newsletter as that analytical tool to optimize growth results.

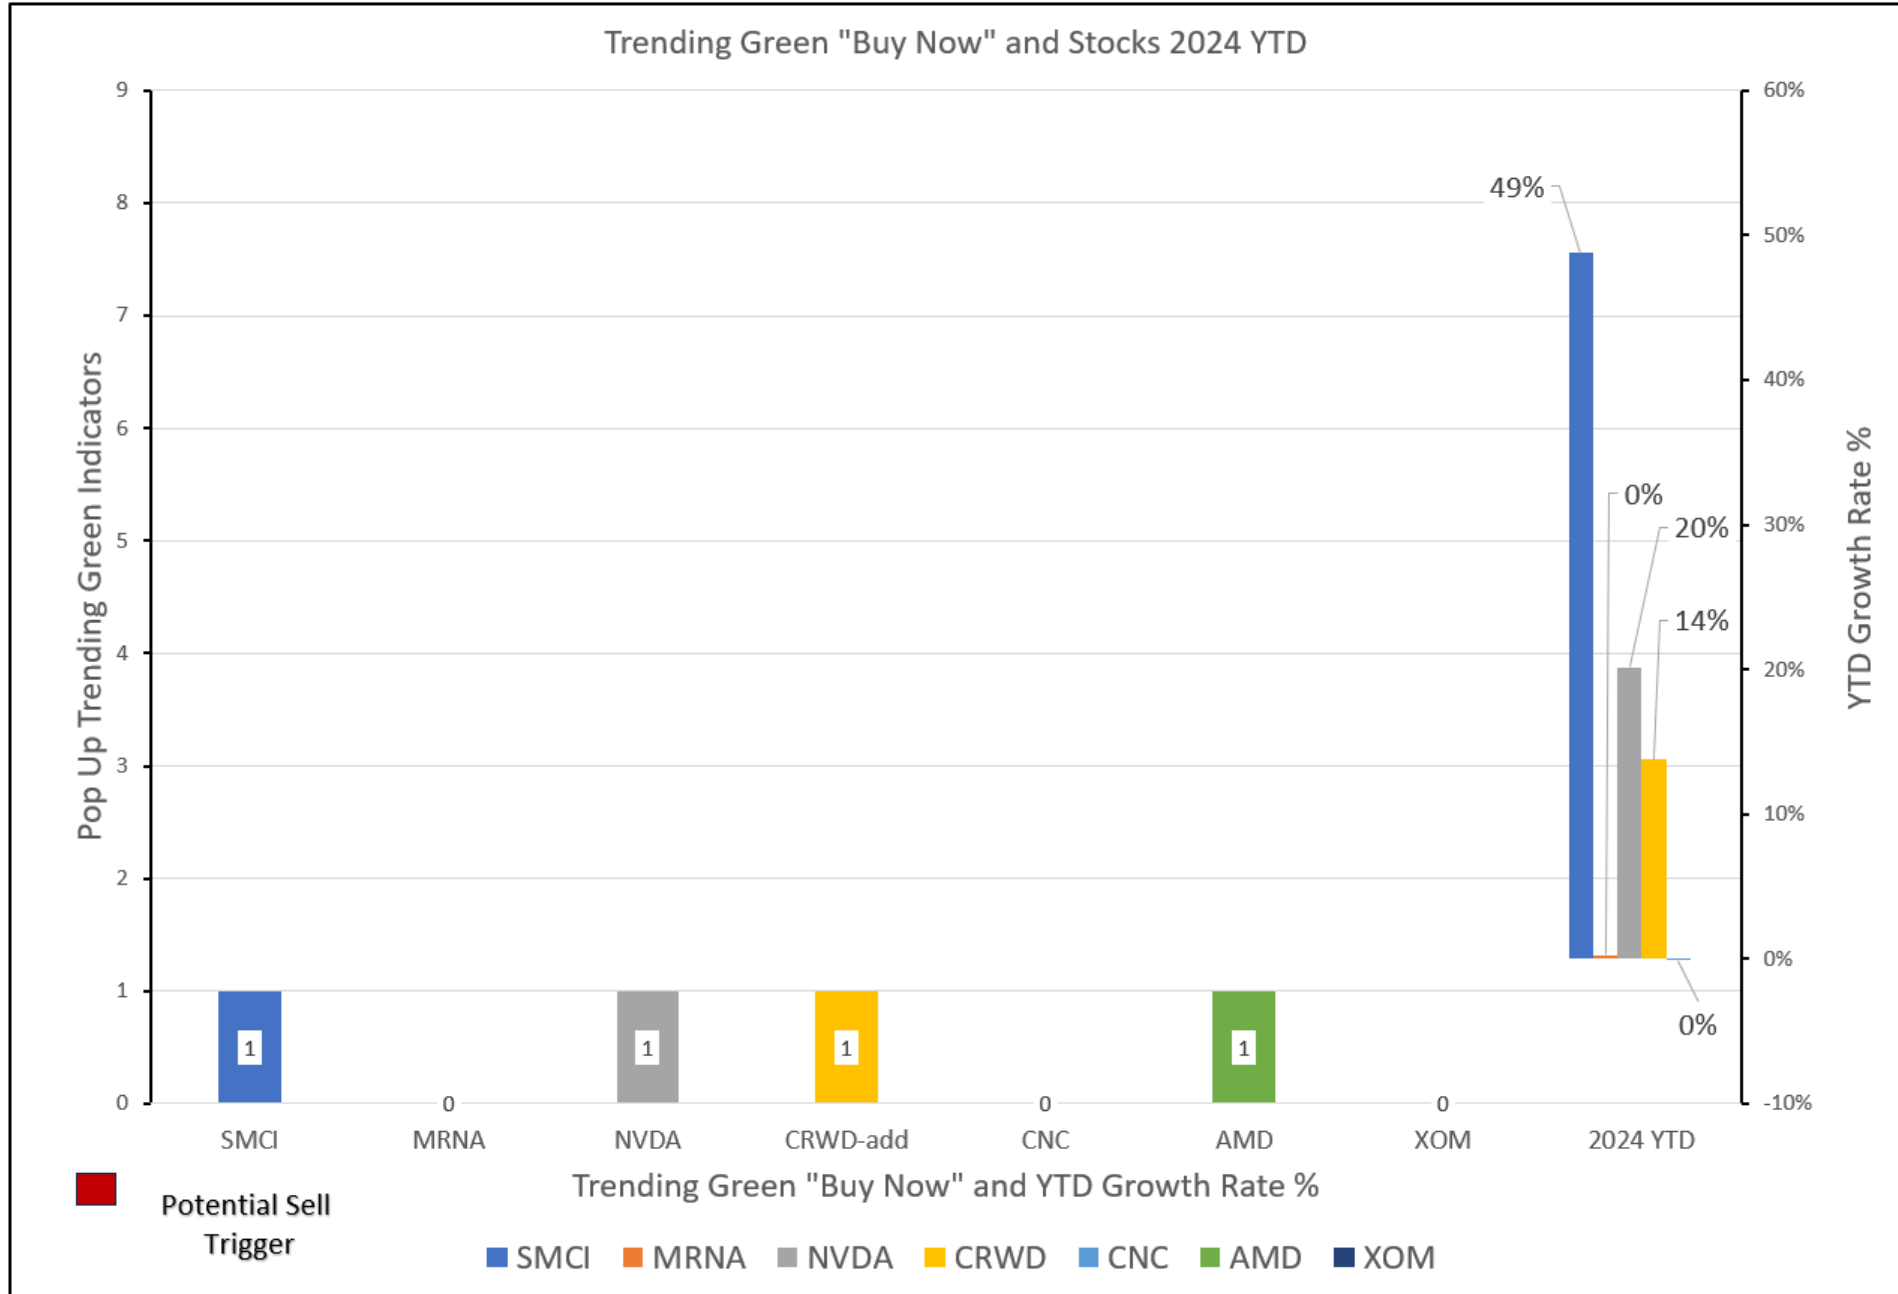

# Explanation of the Bar Charts (3 of 3)

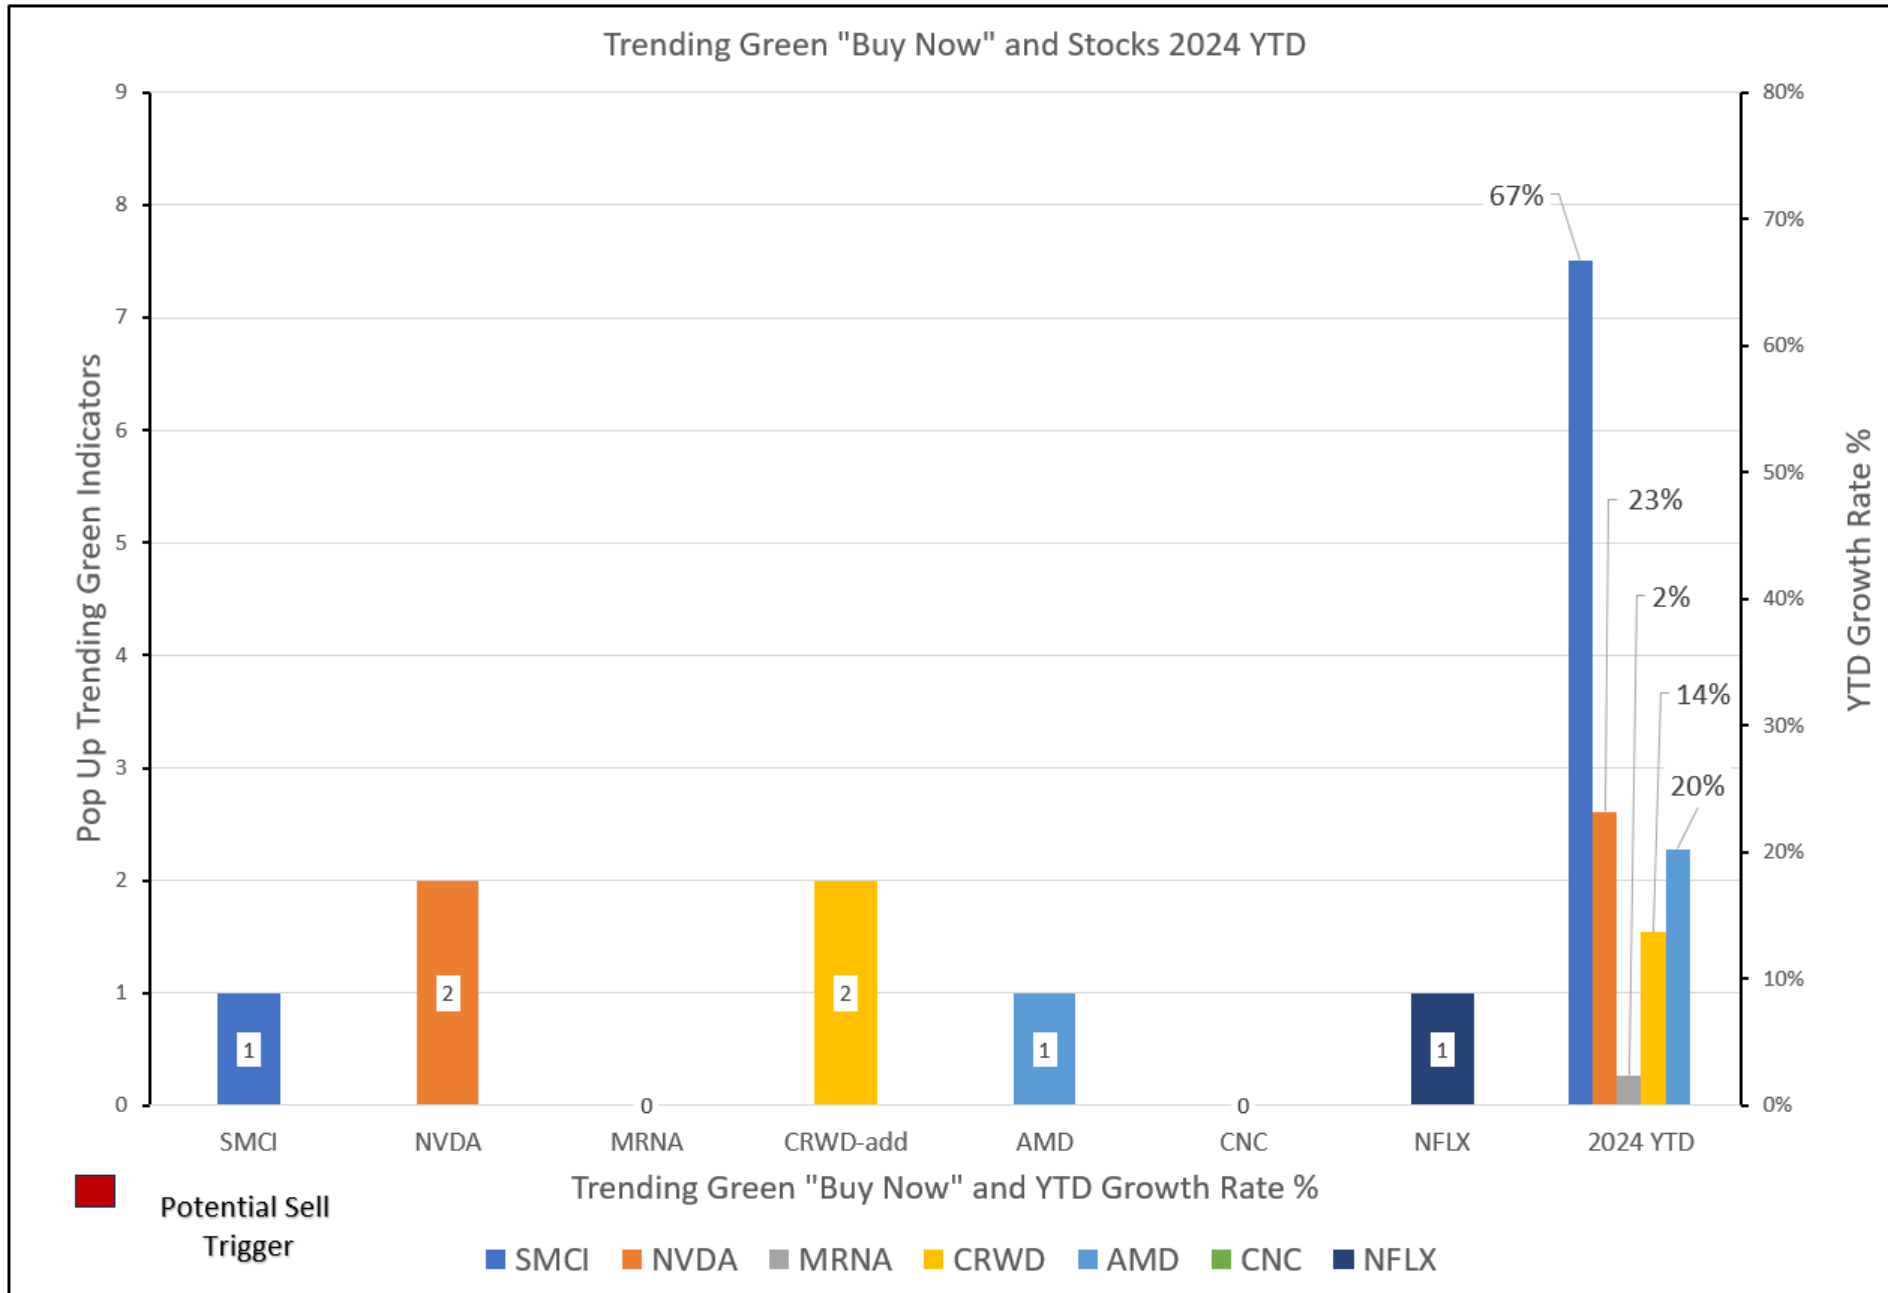

- The fish finder is set at the full depth of the waters to read from bottom surface. The fish finder starts will count fish after a fish rises a specific distance off of the bottom. The fish finder will indicate all fish regardless of size. The size of the fish on the fish finder screen is related to the ranking of the security on the 10-YR annualized chart. This is the reason why you should use the 10-YR annualized chart as a screen mechanism for picking securities to own. It is ok to own a low performing 10-YR annualized security for a one year or two run to get a high YTD performance and sell it when the performance drops.
