

# Big Bank Boss Analytics for Stocks 2023 “Rebound Growth”

By

# Introduction (1 of 2)

- The purpose of everything presented is to support the theme of my book entitled “Hyperdrive your Investment Account to Retire Early”. The PowerPoint slides here are from the Big Bank Boss Newsletter.
- It may seem like plain old good advice, but it's actually the law. The phrase “past performance is not indicative of future results” is a mandatory disclaimer required by the [U.S. Securities and Exchange Commission \(SEC\)](#). Its main goal is to protect investors from relying too heavily on historical returns presented in ads for mutual funds and other financial products. This cautionary statement is crucial for helping consumers make more informed decisions.

# Introduction (2 of 2)

- The Top Year-To-Date (YTD) stock performers vary from 2019 to 2024, so the 11-YR Annualized performance is a good guide for future security purchase or ownership. The Top 1 thru 5 Stocks are highlighted in “Yellow” every year. Year-to-Year performance chart is provided so you have the proper portfolio growth expectation for your investment account.
- Please read my book to gain an understanding of portfolio management. Resist the temptation to panic in the midst of negative monthly performance of the securities in your investment account. Your patience will be rewarded with a Hyper Growth account.

# Explanation of the Bar Charts (1 of 1)

The next PowerPoint slides are bar charts with four key elements:

- (1) The 7 securities shown at the bottom of the chart are positioned from Left to Right that have the highest ranking of 1 thru 7 weekly.
- (2) The left y-axis represents the number of Trending Green or Buy Now indicators for the 7 securities.
- (3) The right y-axis represents the Year to Date (YTD) growth for the first 5 securities from left to right.
- (4) All securities have a YTD floating threshold trigger that must be exceeded before a potential sell indicator is shown in “Red” above the Trending Green indicator. The potential sell indicator is exactly what it is an indicator. You can choose to sell or not. The bar charts are provided as informational analytical information.
