Big Bank Boss Analytics for Stocks 2025 "Stock Market Correction -10% w/ Rebound Average Growth"

By Wayne Boston 2/22/25

Introduction (1 of 2)

- The purpose of everything presented is to support the theme of my book entitled "Hyperdrive your Investment Account to Retire Early". The PowerPoint slides here are from the Big Bank Boss Newsletter.
- It may seem like plain old good advice, but it's actually the law. The
 phrase "past performance is not indicative of future results" is a
 mandatory disclaimer required by the <u>U.S. Securities and Exchange</u>
 <u>Commission (SEC)</u>. Its main goal is to protect investors from relying
 too heavily on historical returns presented in ads for mutual funds and
 other financial products. This cautionary statement is crucial for
 helping consumers make more informed decisions.

Introduction (2 of 2)

- The Top Year-To-Date (YTD) stock performers vary from 2019 to 2024, so the 11-YR Annualized performance is a good guide for future security purchase or ownership. The Top 1 thru 5 Stocks are highlighted in "Yellow" every year. Year-to-Year performance chart is provided so you have the proper portfolio growth expectation for your investment account.
- Please read my book to gain an understanding of portfolio management. Resist the temptation to panic in the midst of negative monthly performance of the securities in your investment account. Your patience will be rewarded with a Hyper Growth account.

Potential Stock Picks for 2025 w/ Year-To-Date Performances from 2024 - 2019

Symbols in italics are the BATMMAAN Eight Stocks

BATMMANN Definition

- More than a decade after FANG became a popular way of grouping top-performing technology stocks, there's a new acronym in town.
- Enter BATMMAAN, a term that has been making the rounds since another potential tech kingmaker Broadcom began closing in on the \$1 trillion market cap club last week. The grouping is as follows: Broadcom (AVGO), Apple (AAPL), Tesla (TSLA), Microsoft (MSFT), Meta Platforms (META), Amazon.com (AMZN), Alphabet (GOOGL) and Nvidia (NVDA). In other words, the "Magnificent Eight."

Explanation of the Bar Charts (1 of 1)

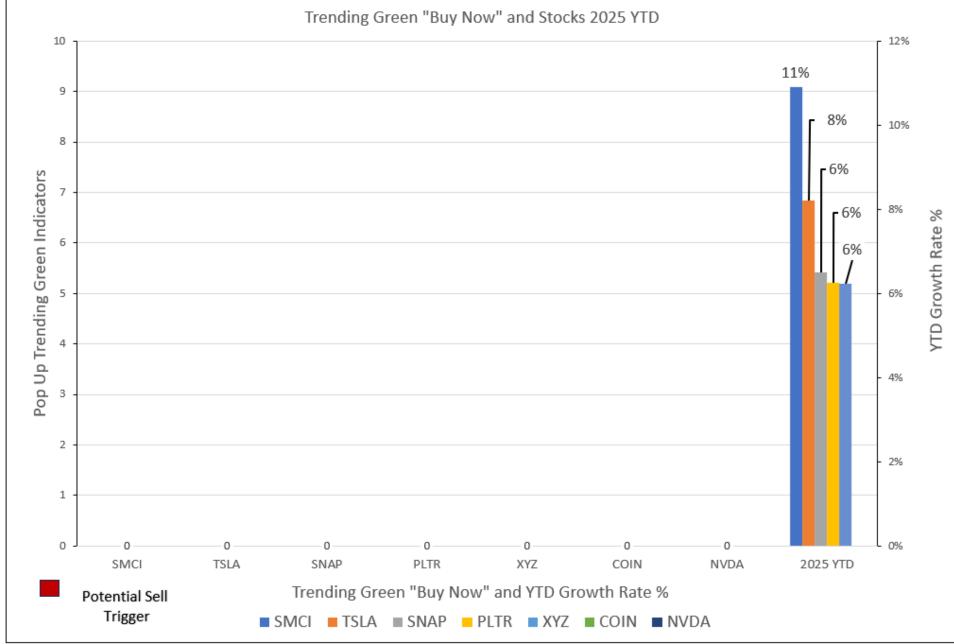

The next PowerPoint slides are bar charts with four key elements:

- (1) The 7 securities shown at the bottom of the chart are positioned from Left to Right that have the highest weekly ranking of 1 thru 7.
- (2) The left y-axis represents the number of Trending Green or Buy Now indicators for the 7 securities.
- (3) The right y-axis represents the Year to Date (YTD) growth for the first 5 securities from left to right.
- (4) All securities have a YTD floating threshold trigger than must be exceeded before a potential sell indictor is shown in "Red" above the Trending Green indicator. The potential sell indicator is exactly what it says, "Potential Sell Indicator". You can choose to sell or not. The bar charts are provided as informational triggers based on analytics and not from opinion.

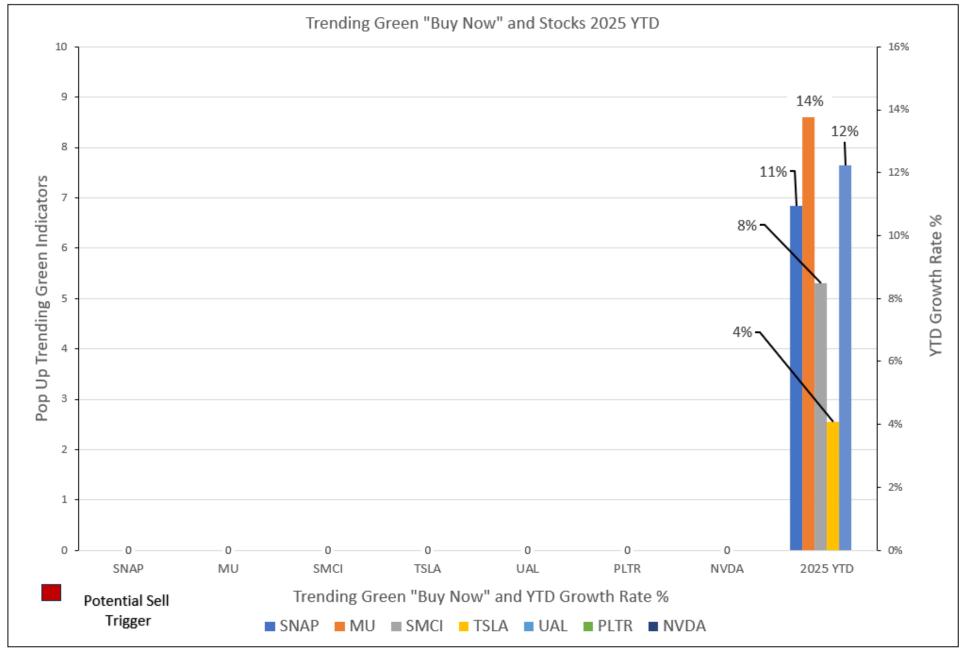

Legion for the next Table to the Right

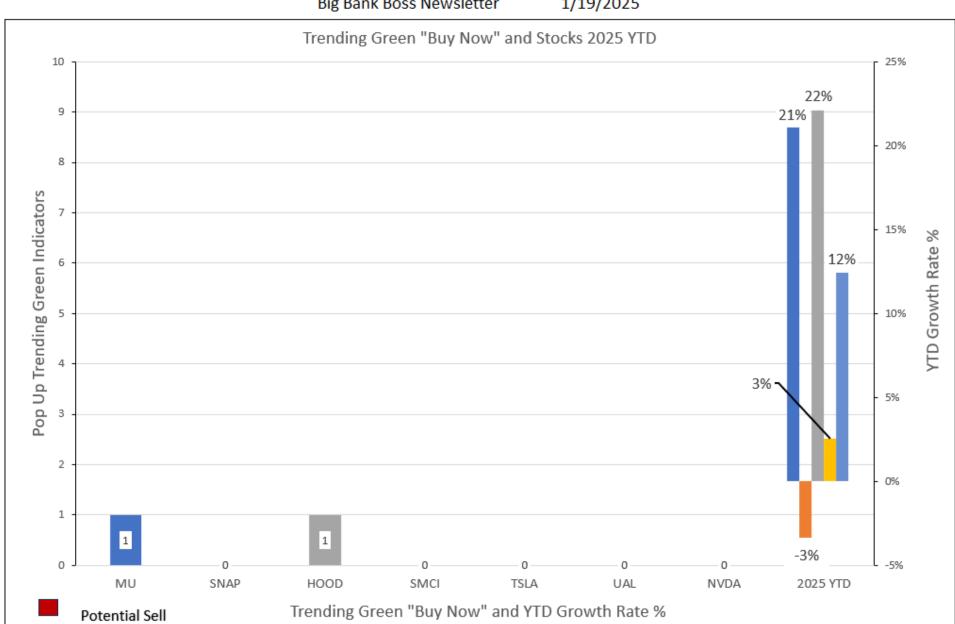

- Trending Green (wks) This provides you with the number of weeks a particular stock has been between the Buy Price ranges. The float provided is a default for all stocks, but the float is increased for stocks that have a Spike Ratio of 2.0. This small Buy Now range could be jumped over because of the data being measured is once every 7-days. Yes, the cell could have N/A in it and not catch anything. This active trader tool is suggestive and is not intended to be an absolute tool to make sell decisions.
- The gray row numbers from left to right has meaning. The first number represents the number of stocks that are in a purchase now indicator "highlighted in green". The second number to the right is the number of Stocks (63 stocks being tacked) that are at Low-Price Indicator price.
